

Faith, Knowledge, Stewardship

From the nature of the Catholic school also stems one of the most significant elements of its educational project: the synthesis between culture and faith. Indeed, knowledge set in the context of faith becomes wisdom and life vision. The endeavor to interweave reason and faith, which has become the heart of individual subjects, makes for unity, articulation and coordination, bringing forth within what is learned in school a Christian vision of the world, of life, of culture and of history.
