STEAM News

February was a short month, but students in STEAM class still accomplished a lot! Kindergartners celebrated the 100th day of school by making pattern necklaces. They also learned about engineers and built various things, including an invention to help someone in their family. 1st graders finished up their science unit learning about the moon's phases and then combined art and engineering to make heart structures and masks. 2nd grade enjoyed learning computer programming on their tablets using the FREE app Scratch Jr. These students used their creativity and coding skills to make animated programs and proudly shared their work with others. 3rd grade learned about magnets in various hands-on science experiments and then used only 'the force' to move their rover around Mars collecting scientific data. 4th graders continue their unit on energy, learning about electro-magnets and making their own telegraph machine to communicate with each other via Morse Code. Lastly 5th graders dove into a science unit on gravity, conducting scientific testing to learn its effects, or lack of effect, on mass and weight.

ATTENDANCE

Students are at risk of being marked truant when a call or written note from a parent/legal guardian is not presented to the school within three (3) days of an absence. The definition of an absence includes: a partial or full day absent from school. These types of absences can be marked truant if contact from the parent/legal guardian is not made within the allowed time limit.

BOBCAT TRACKS

You will receive a copy of our "Bobcat Tracks" newsletter each Monday. If school is not in session on Monday, then you will receive it on Tuesday. We translate the "Bobcat Tracks" into Spanish. If you would like your copy in Spanish, please have your child let his or her teacher know.

Both versions are on our Website listed at the top of this page.

There is a great deal of very important information in each newsletter so be sure to read it carefully each week.
