Villa Rica Elementary Weekly News & Updates

Mr. Springer's Corner

Parents,

Reading with your child and helping them practice specific reading components can dramatically improve their ability to read. Scientific research shows that there are five components of reading that children must be taught in order to read. Over the next few weeks, we will be sharing a tip each week with you.

Tip # 1

Recognizing and using individual sounds to create words is important in helping children learn to read. This is known as phonemic awareness. Students need to be taught to hear sounds in words and that words are made up of the smallest parts of sound.
