Villa Rica Elementary Weekly News & Updates

Mr. Springer's Corner

Parents,

Reading with your child and helping them practice specific reading components can dramatically improve their ability to read. Scientific research shows that there are five components of reading that children must be taught in order to read. Over the next few weeks, we will be sharing a tip each week with you.

Tip # 1

Learning the meaning and pronunciation of words, or vocabulary development. Children need to actively build and explain their knowledge of written and spoken words, what they mean and how they are used.

If possible over the next week, we ask parents to teach your child 3 new words and explain the meaning of the word.
