# Kansas State School for the Blind

Is pleased to announce our  
**Early Childhood Program**  
for children with a visual impairment  
**including deaf-blindness**  
beginning **2018-2019** school year.

## Early Childhood Program

This dynamic program will serve children ages 3 to 6 years as part of the KSSB campus programs.

### Focus on Expanded Core Curriculum and Academic Skills

The Early Childhood Program will focus on intensive instruction and emphasize the Expanded Core Curriculum (ECC) domains unique to students with a visual impairment. These include: braille readiness, communication, orientation and mobility, social skills, independent living skills, self-determination, technology, and much more!!!

The goal is to develop skills and concepts in children through intentional instruction rather than incidental learning.

### Partnership with Local School District

KSSB works closely with local districts to ensure students are making progress and will successfully transition to more typical settings in their 'home' district.
