for taking part in
STEM night! —>

STEM night was held on Tuesday, February 5th. We had a wonderful turnout of 144 guests! The night began with refreshments, and a short presentation about the STEM programs offered at JES. Shortly after, students were divided into 3 groups based upon grade levels (4K/5K, 1st/2nd, 3rd/4th). The youngest group was given plastic cups and popsicles sticks, with the task of building the tallest tower possible, without allowing any cups to touch. 1st and 2nd graders were given index cards and tape, along with the task of building a tower that is at least 2 feet tall, and can hold a small stuffed animal. Finally, the 3rd and 4th grade teams were given straws, tape, and popsicles sticks, with the challenge of building a tower that would support a tennis ball. Altogether, students and family members had a fantastic time learning more about the STEM initiatives taking place at Johnsonville Elementary School!

Celebrating Black History

Students in Mrs. Wynde Clark's third grade enrichment class completed a collaborative poster of Martin Luther King, Jr. They were each assigned a piece of the poster to color. Then, they collaboratively put the pieces together to form a picture of Dr. King. The students worked hard and did a wonderful job showing that individual efforts can be brought together in unity, much like the legacy left by Dr. King's civil rights efforts.

"If I cannot do great things, I can do small things in a great way."
-Martin Luther King, Jr.
