

Lesson 8-1

Find the missing side length of each triangle. Round your answers to the nearest tenth. Do the lengths form a Pythagorean triple? Answer yes or no.

The lengths of the sides of a triangle are given. Classify each triangle as acute, right, or obtuse.

11. A repair man leans an 18 ft ladder against the side of a house. If the ladder hits the house at a height of 17 ft, how far from the house is the base of the ladder? Round to the nearest tenth.

Lesson 8-2

Use special right triangles formulas to find the missing side lengths in each triangle. Write your answers in simplest radical form.
