Job Summary

The Summer Student Plant Engineering Intern will be responsible for rotating through the various departments of an industrial plant producing electricity. These departments cover both gas and coal-fired units and include engineering, planning and logistics, compliance (accounting, environmental, regulatory), maintenance, and operations.

Job Description

- Must be able to effectively communicate with other employees and retain information that is given.
- Students will have an initial plant fundamentals course covering 21st century electrical generation.
- Job consists of inside and outside duties – interns will shadow department employees in their daily activities.
- Final week of rotation will be spent in the department related to the student's field of interest: engineering, accounting, skilled trades, etc.

Job Requirements

- Must be enrolled in the Engineering or Manufacturing Academy
- Must have at least a 3.0 GPA or better
- Must have good attendance and behavior record in school
- Must arrange their own transportation to / from the plant
- Due to the industrial environment, students must have proper cotton clothing and protective footwear. All other PPE (personal protective equipment) will be provided by plant.

Application Procedure: Please forward your resume and cover letter to your school Signature Academy Specialist.
