Slide Open Ended Question

Answer

4 Let's see what you already know about maps. What sort of things do you find on a map and what are they? A map shows direction and it shows where to go. It is made out of paper and has every city.

8 Explain the difference between a political map, physical map, and topographic map.

The difference between a political map, a physical map, and a topographic map is the a political map shows buildings and roads, a physical map shows how the earth would look if you were in space, and a topographic map shows the elevation of the land.

22 Explain the difference between lines of latitude and lines of longitude.

Latitude goes left and right and longitude goes up and down.
