Foundations I and Foundations II
Summer Assignment

June 2017

Dear Parents, Guardians, and Students:

Students in 8th grade and students in Foundations I class at the high school used the Moby Max website to practice a variety of math concepts and skills throughout the school year. Students will continue to have access to this website over the summer. The purpose of students using this website is two-fold. First, is to keep math skills at the same level or higher than when the school year ended. Second, is to help students and teachers identify the prerequisite concepts and skills that each student has and has not mastered.

Students should complete a minimum of 4 hours of Moby Max over the summer. Moby Max will provide a variety of lessons to meet the needs of each student. Students should keep track of their progress in the log provided and bring the completed log to school on the first day of class.

To access the website, go to: www.mobymax.com. Students will then be asked to enter their username and password. This is the same username and password that they have used throughout the year.

Write your username and password here so you don't forget it over the summer!

Username: _____

Password: _____

The mathematics department thanks you for your support and wishes you and your family a happy and restful summer!

Sincerely,
John Snow
Foundations I and II Teacher
