## Willington Public Library's Summer Reading Program Kick-Off!

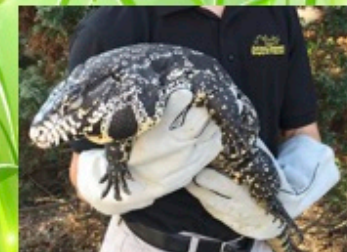

# Animal Embassy

Saturday, June 25, 2016

@ 1:00 PM in the Community Room

### *Athletes of the Animal Kingdom*

With this interactive, educational and entertaining program, families will encounter a diversity of creatures with amazing athletic skills. We'll meet frogs that furiously unfurl their tongues to catch insects & giant prey, lizards that mark their territory with vigorous push-ups, rabbits that escape predators by sprinting, and birds that can fly formidable distances! We'll discuss how some of these skills help each animal athlete to survive in its habitat as well as why, like us, our animal friends need a nutrient-rich & healthy diet to support their activities. We will explore a myriad of athletic feats with live Animal Ambassadors such as a Veiled Chameleon, an Argentine Black & White Tegu, Gray Tree Frogs, a Rabbit, a Carpet Python and a Lovebird.

# Chair Yoga

**with Yoga Instructor, Joy, YTT**

Chair yoga is a gentle form of yoga that is practiced sitting on a chair or standing using a chair for support. Chair yoga is one of the gentlest forms of yoga available. It is taught as a way to achieve physical and mental fitness as well as helping to deepen flexibility and strengthen personal body awareness. Complicated maneuvers and complex movements are not present in a chair yoga class.

Each class is 45 minutes and seats are limited to a maximum of 8 at a time per class, so registration is suggested. Be sure to wear comfortable clothing for freedom of movement. No experience is required.

As space is limited, please sign up in advance by calling the library at 860-429-3854, sending an email to [dlinares@wilmingtonpubliclibrary.org](mailto:dlinares@wilmingtonpubliclibrary.org), or visit the library!

# AWESOME ACTIVITY WEEKS - SUMMER 2016

## Brixology

**New Mad Science program with LEGO™ Bricks**

Brixology Camp sets the foundation for our next generation of makers! Kids learn about different types of engineering and then team up to construct a different engineering-themed project using LEGO™ bricks. They learn about aerospace engineering while assembling a space station. They explore mechanical engineering as they build boats and vehicles. That's not all, from carnival rides to drawing machines, mechanical animals to truss bridges, your future engineer will build upon their creativity to solve real-world design challenges, while developing their problem-solving and team-building skills. Let the tinkering begin!

## Anatomy Academy

In this weeklong camp, children will have fun while learning about the scientific equipment they already own—the human body. Kids will explore the science behind cells, organs, muscles and bones through fun, hands-on activities. Campers will use micro-slide viewers to see some of the tiny cellular machines that keep our bodies working and will play the "Cell game" to learn about the "stuff" inside cells. Fun experiments will help campers understand more about their senses, brains, breathing, circulation and digestion. Children may create model cells, make Mad Mucus and a simulated stomach, build simple lung models, assemble a model skeleton, and much more.

## E<sup>2</sup> - Engineering Explorers

Whether your child loves to build things or destroy them, this week of camp includes lots of both! The junior Mad Science engineers will design and build bridges and "skyscrapers" using simple tools and their imaginations. Kids will even construct a geodesic dome big enough for all the campers to sit inside! Then the machine madness starts as they discover how many different machines, simple & complex, we use in our daily lives. Campers will have fun designing simple machines using pulleys, wedges, screws and levers. Then we move on to engineering in action – your kids work together to brainstorm, design, test, evaluate and redesign problem-solving contraptions!

## SECRET AGENT LAB

Develop your special agent and detective skill in this super hands-on week of fun! Uncover the science involved in evidence gathering and analysis. Sharpen your secret agent skills and discover how chemistry and the science of forensics can come to the aid of a secret agent. Identify and collect evidence – from fingerprints to tracks to trash! Secret agents-in-training will use science and awesome technological tools to connect the dots and help sniff out the suspects in this investigation into the science of sleuthing.

## Crazy Chemworks

We'll learn about the tools scientists use in their laboratories – atoms, molecules, and reactions; acids and bases; and fluorescence and phosphorescence. We'll also examine and investigate super sticky things by exploring suction, hydrogen bonding, and static cling and see some very cool dry ice demonstrations! The best part is that each day we'll be able to continue the science fun at home with our very own labware take-homes!
