

Parent Portal Registration

Purpose: Parent Portal Setup

Focus allows parents to directly log in to the school district's site, where they can view the information for their enrolled student(s). This documentation provides step-by-step guidance for parents to set up their own Focus portal from the **Request Access** screen. If a parent has multiple children enrolled in the district, they can add each student individually. The schools have set up the information requirements to create a parent account, and additional verification may be needed before student information can be accessed.
