

Title I Budget Information

About 2/3 of our 2017 Title I budget pays for extra teachers to work with students. Another 13% is used for either online computer subscriptions or paper instructional guides and supplies to be used directly with students. The remaining 13% funds our Family Resource Center, including a part-time Parent Involvement Coordinator, allows us to replace aging computer equipment, and pays for some teacher training. See the chart below for a summary of our 2017 budget.

Parent input is always welcome regarding how we spend our Title I funds. If you have suggestions for us or want to know more about Title I funding, please contact me anytime. Your suggestions can help us as we budget for next school year.
