

Title I Family Night – "LEGO Math"

Tuesday, January 24, 2016 @ 6:00P.M. – 7:00P.M.

Graysville Elementary

Evaluation Form Written Responses

What did you like most about the event?

- Quality time with my son! ☺
- Hands on math made this very fun
- Building the LEGOs
- Kids were involved and had fun
- That we were able to learn using fun things like LEGOs
- It makes the students be creative
- Just a chance for kids to have fun while learning
- I like how the groups were spaced out (i.e., not all kids went to the same classrooms)
- Math skills
- I enjoyed the catapult and maze events! It was fun to work as a family
- The LEGOS made the learning fun
- Family time and fun
- Fun
- Wore my kids out to go to go to bed.
- Different rooms having to go to makes it more exciting
- Challenging the kids with math!
- Fun way to bring families together at school. Engaging to parents and students
- Interaction with the kids
- Theme & people. Kids love LEGOS. Everyone was great
- I like all
- All involved was great, smiling, and welcomed parents and kids
- Hands on family activity
- Making math fun
- Everything!
- Building the different things with LEGOs
- The fun activities engaging parents and children together
- Well organized, interactive and fun
- The way it was fun and educational
- LEGOs it is fun and educational
- All the smiles and my child had a blast
- Fun with LEGOs

- I am so impressed with how organized the event is! I love that we went to different rooms – it kept the flow!
- It was very creative and my son got really involved
- Going to see the classrooms
- Making the LEGO man at each point
- We loved the LEGO theme. It was lots of fun.
- The activities with LEGOs
- Family fun time
- The whole event was a good way to learn counting, different shapes, how things are made and work.
- Spending time with my children at their school
- Fun & learning at the same time. Had a chance to see the teachers.
- It was well organized

Is there anything you would change about the event?

- No, it was great!
- Maybe more LEGOs and shapes or characters
- Some of the rooms got pretty crowded
- No, it was super fun!
- Many parents were confused about the layout
- No, it was great!
- All very good and interesting
- LEGO math was just long enough to be fun and interesting
- Maybe more defined math problems. Parent had to interpret problems for child
- I think each table should have the LEGOs spread out instead of 1 or 2 bins in the entire room. It was hard to get to the bins.
- The amount of stations and some LEGOs were not applicable for the project (not enough). Right idea – great thoughts, too many people, not enough stations
- None – it was fun!
- NO! GES is awesome and we love the events you provide
- N/A – Thanks for all you do!
- If the instructions at each station were a little more clear – it was just a little congested.
