

ARCHITECTURE and CONSTRUCTION

The Architecture and Construction program offers students many opportunities to be prepared for their career future. Beginning with a curriculum that includes relevant academic standards integration, hands-on projects for opportunities to master course standards, career related education availabilities, and certification options, students enrolling in one of the Architecture and Construction pathways will graduate prepared for their future.

Students completing an architecture and construction career pathway will have foundational knowledge and skills for a construction career. As the student progresses through the pathway, they are given the opportunity to explore a variety of construction careers.
