

HUMAN SERVICES

FAMILY AND CONSUMER SCIENCE

Family & Consumer Science offers a unique focus on families, work, and their interrelationships while providing a solid foundation of success for students. Through relevant coursework, community projects, student organizations, and internship/mentoring opportunities, students develop the essential leadership, life, and communications skills they need to become responsible citizens and leaders in family, community, and work settings.

Students will learn to manage resources to meet the essential needs of individuals and families, promote optimal nutrition and wellness across the life span, and accept responsibility for their actions and success in family and work life. The career and educational opportunities available in Family and Consumer Sciences are varied and virtually unlimited, as are the postsecondary educational opportunities.

Food and Nutrition Pathway

Course 1 - Food, Nutrition & Wellness

Course 2 - Food for Life

Course 3 - Food Science

The following courses count towards satisfying the fourth science requirement and have been approved by the Board of Regents: Food for Life and Food Science.

National Certification

Upon the completion of a Construction Pathway, students may earn a national credential with successful completion of the End-of-Pathway Assessment.

Career Technical Student Organization

Family Career and Community Leaders of America (FCCLA) is the Career and Technical Student Organization for Family & Consumer Science.
