April 2-6	Spring Break

Check on the school website and social media for upcoming events!

HELP HONE YOUR TEEN'S BUDDING STUDY SKILLS.

Studying for tests is a skill. For struggling students, it's a mystery. "Unsuccessful test takers don't know where the questions come from," says Burke. "The kids who don't succeed tend to think the others are lucky." Some tips to remember in helping your child:

- Your student can practice active learning when studying – highlighting notes, using Post-its to mark key textbook passages, making study cards, and mapping and diagramming concepts.
- Some students focus better in the morning, others at night. Help your teen find the times that their efforts will be most effective.

- Sometimes we just have to memorize. You and your teen can work together to come up with a plan that will enable them to recall information. Your teen's teacher can assist you with this task.
