Heidi Hines, Asst. Principal

August 2018

Dear Parent/Guardian:

Our school safety plan is routinely assessed to ensure that the best practices are in place to protect our children. This plan has been approved and commended by the Georgia Emergency Management Agency and the Office of Homeland Security. Teachers and students are taught what to do in the event of fire, severe weather and school lockdowns.

We practice so that our students, faculty and staff have the knowledge to protect themselves and so they know what to do if a situation arises. Our School Messenger automated system is capable of calling every parent in a matter of minutes to help keep you fully informed.

In August and January, our staff and students will be practicing our code yellow, code red and code red active intruder drills with the students. These drills are practiced to ensure that everyone understands what to do in an emergency situation.

In closing, if there were an emergency, student and staff safety would be my first priority. These procedures and practices are designed for their protection. Please do not hesitate to contact me if you have questions or suggestions.

Sincerely,

Leslie M. Shultz
Principal
