

OCEAN NIGHT

Come and get a sense of the feel of the spray of saltwater in your face and sand under your feet. See the variety of ocean wildlife: jellyfish, octopi, seahorses, fish, sharks, and whales. Look at the coral reef, seaweed, and other ocean plants. Learn interesting and amazing facts about the ocean!

All this and more will be featured at the BCES “Ocean Night” this Thursday, April 7. Come and tour the classrooms and hallways from 6:00-6:30 with your child. Be sure to travel from PK – 4th grade classrooms to get a sense of the growth of our students’ knowledge and skills as they progress through the grades.

As an added treat **have your child bring you to the gym at 6:30** where each grade will perform an ocean-themed dance.

Please plan to attend so that our students can show you their great work and demonstrate their skills.
