What does the 5Essentials survey tell us about the school's learning conditions?

This year, for the first time, Illinois schools piloted an anonymous statewide survey of learning conditions, the 5Essentials Survey. The 5Essentials Survey provided an opportunity for students in grades 6 through 12 and all teachers to share their perspectives on essential conditions for learning. Next year, results from the 2014 survey will appear on the report card in the format below. A detailed report for all schools and districts will also be made available in 2014.

Questions and Resources

Q: Where can I find more information?

A: In addition to this report card, you can visit IllinoisReportCard.com to take a more detailed look at the data shown here. IllinoisReportCard.com shows more years of data, shows more of your school's programs, courses, and activities, and provides you with powerful tools that let you dig deeper into your school's data in the context of schools state-wide.

Q: I am not sure what one of the scores here means. Where can I find out?

A: IllinoisReportCard.com reports all of the scores on the School Report Card, along with definitions and longer explanations of what the data means in the context of school performance and continuous school improvement.

Q: What is the origin of the data for the new School Report Card?

A: Most of the data reported on the School Report Card is collected by ISBE from school districts through data systems such as the state's Student Information System and its new Employment Information System. Some data, such as information on extracurricular activities, is entered directly by principals on IllinoisReportCard.com so that it can be kept up to date throughout the year.

Q: Which standards are used to determine if students are Ready for College Coursework?

A: All Illinois students take the ACT test in 11th grade, which includes multiple-choice tests in each of four subjects: English, Mathematics, Reading, and Science. ACT has established benchmark scores for each of these four tests that represent the level of achievement required for students to have a 50% chance of obtaining a B or higher or about a 75% chance of obtaining a C or higher in corresponding credit-bearing first-year college courses. The average of these four benchmark scores is 21; therefore, students in Illinois who achieve a composite score of at least 21 on the ACT are considered to be Ready for College Coursework.

Q: How is the four-year graduation rate calculated and why is there a separate five-year graduation rate?

A: The four-year graduation rate is calculated by dividing the number of students who graduate in four years by the total number of students in the graduating class (which accounts for students who transfer in or out of the class). The five-year graduation rate calculates the same for students who graduate in five years. For example, for the 2012-13 school year, students who entered ninth grade in 2009 and earned a high school diploma through the summer of 2013 are counted in the four-year graduation rate, while students who entered ninth grade in 2008 and earned a high school diploma through the summer of 2013 are counted in the five-year graduation rate.
