

# Academics & Test Scores

## *Do you offer on-line and/or dual credit courses?*

In partnership with Southeast Missouri State University and Concordia University-Wisconsin, *Christ Our Savior* currently offers students college credit with dual enrollment courses. These dual enrollment courses allow students to shorten their time in college by taking courses while still in high school. A recent graduate earned 27 credits while attending high school at *Christ Our Savior*, shaving almost a year off of college.

## *Can COSLHS offer my student appropriate use of current technology?*

*Christ Our Savior* utilizes a 1:1 (one to one) program with iPads. Our teachers have embraced the latest technology and we want our students to be prepared to engage the world through these means as well. Each student will work with their own iPad to learn and explore their subjects, to prepare and produce high quality work that demonstrates a mastery of their learning. It is our desire for our students to be prepared to compete with graduates from any school for scholarships, entry to prestigious colleges or the occupation of their choice.

Today's students must have access to current technology and training to prepare for their careers. Students also utilize the computer lab to gain experience using desktop applications.

## *What do COSLHS graduates do after high school graduation?*

Our students are well-prepared for the next step after high school. For most students, this means going to college. With ACT scores that surpass the Illinois state average, our students are often in a position to attend the college of their choice. Once in college, they experience a natural transition from the academic rigor at *Christ Our Savior*. Students at 2-year and 4-year colleges, public and private institutions have returned to say "thank you" for being so well-prepared.

*Christ Our Savior* has alumni working in the fields of engineering, medicine, marketing, military, ministry and education. Graduates have also gone straight into the workforce after graduation in the construction industry.

## *What standardized tests do students take at Christ Our Savior?*

*Christ Our Savior's* testing program includes:

Freshmen - EXPLORE test

Sophomores - PLAN test (ACT Prep test)

Juniors - PSAT and ACT (Qualifying for National Merit Program)

Seniors - ACT test
