

MIS Techsperts

Are you interested in becoming your classroom's technology expert? Through these before-school trainings, you'll learn how to become the go-to person with all things tech and Google. This new club will start with *Computer Fundamentals*, *Basic Troubleshooting*, and *Google Guru* training sessions. After passing online modules, showing you have a vast knowledge of these topics, you'll become the *MIS Techspert*, receiving a badge to wear in the classroom during digital lessons. *Techsperts* will begin assembling reference videos for all to view, showing how to do various things on the computer.

Meetings will take place on Tuesdays before school, 7:50-8:20 AM with Miss Horsch. The cost of the club is \$25. There will be a limit of 28 participants for the program with a goal of having 2 per classroom.

If you are interested in participating in the program, fill out the form below and return to MIS by Wednesday, Sept. 12.

MIS Techsperts – Return by Wednesday, Sept. 12.
