STEM

Problem solving will be the major focus of our STEM Club. During our meetings we will be engaged in activities that will require our members to think through a problem logically, research possible solutions, work collaboratively, and finally create a solution.

STEM Club will be on Thursdays in the computer lab from 2:45 – 3:45. In order to make the experience as meaningful as possible, a limit of 25 students per session must be put into place. We will have 2 sessions: Session 1 will begin on December 1 and Session 2 will begin on March 2. Each session will meet 10 times. Specific dates will be sent home once the groups are formed.

Please select your preference below. I will do my best to accommodate your requests.

Forms are due back by Friday, November 4, 2016.
