

## snowSMART Days

Students & Parents,

This page will assist you with knowing what to do during a non-traditional instruction/**snowSMART** day.

### **What is a non-traditional instructional day or snowSMART day?**

This is another term for a "snow day" in which students must work/complete assignments from home. However, we do have snow days built into our district calendar. We also have time for makeup days that we will add to the school year before resulting to the non-traditional instruction (NTI) day. Therefore, this day will be used in an emergency situation and you will be notified if and when the district intends to use it.

### **What lesson will my student need to complete on a non-traditional instruction day and Where are the assignments located?**

Please see your homeroom teacher's web page to access your class snowSMART Day Assignments or your snowSMART folder. You will be able to access all of these assignments from our teacher's web page, and teacher Google Classroom page. For each assignment, your student will have a short lesson and a corresponding activity that will be due to the teacher upon returning to school.

### **How will we correspond with the teacher(s) if we have questions?**

First, our e-mails are always a good bet so that we can communicate back and forth. **Second, you may text me (Ms. Bethany) at any time at 270-350-3714.** All information will be posted on teacher websites as well. Teachers will respond in a timely manner.

### **What if we do not have internet access?**

If you do not have internet access, please check no on the form that was sent home with your student and return to school. We will prepare your student's NTI (snowSMART) folder with nontechnology assignments.
