It's Raining, It's Pouring!

Rain is a type of **weather**. Weather is the condition outside at a certain time and place. There are many different types of weather.

Five Types of Weather

Different types of weather can happen in March. What is the weather like near you?

Sunny

Sunlight comes from the sun. The sun is a huge, hot ball of gas. It sends warmth to Earth. How warm or cold it is outside depends on how much sunlight reaches Earth.

Cumulus clouds are puffy, white clouds.

Cloudy

Clouds are groups of tiny drops of water floating in the air. Clouds can be puffy and white or flat and dark. They can block the sun from shining in places.

Snowy

Snow is made up of tiny pieces of ice that fall to Earth. The pieces of ice stick together to form snowflakes. Each snowflake has a different shape.

Rainy

Rain is made up of drops of water that fall to Earth from clouds. Rain gives fresh water to people and animals for drinking. Plants also need water to grow.

Wind carries things such as leaves.

Windy

Wind is air moving on Earth's surface. Wind carries things such as plant seeds from one place to another. It can also carry a kite high into the sky!

Extreme Weather

Sometimes weather can be dangerous. Check out three types of wild weather.

Tornadoes are twisting, strong winds. They are often caused by thunderstorms.

Floods happen when it rains a lot. Water pours from rivers and streams onto streets.

Blizzards are snowstorms with strong winds. The snow can pile up very fast!
