

iRead Mobile Access

The iRead app is available to all students with active program log-ins. Teachers and students may access the student software on an iPad by downloading the app from the app store and configuring the apps.

Downloading and Configuring iRead

To download and access the app, devices must meet the following requirements:

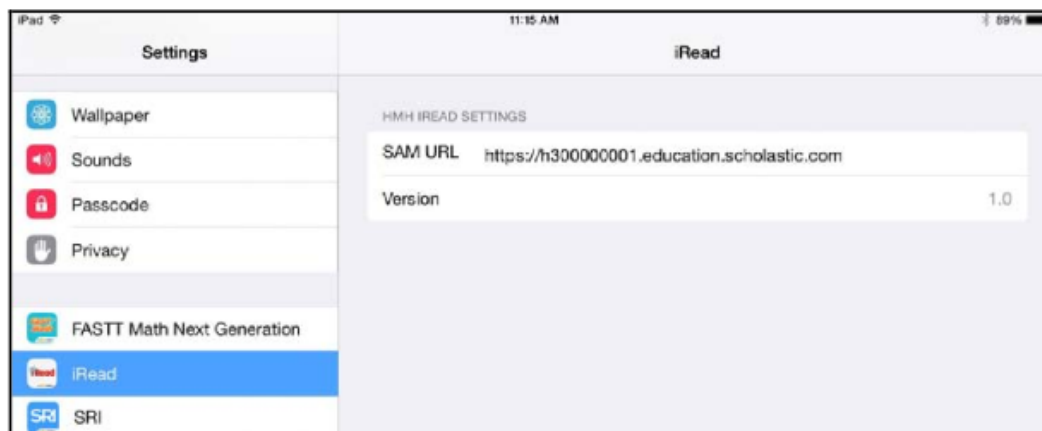

- iPad 2 or later
- iOS 7 or later

When these requirements are met, the app may be downloaded from the iTunes App Store.

Configuring *iRead*

Prior to the first launch of the app, tap the **Settings** icon on the iPad Home Screen. Tap the **iRead** link from the Settings menu.

In the SAM URL field, enter the host ID. The host ID is the number that starts with h1 followed by eight digits in the SAM Server URL:

-SAM Server URL: <https://h100001044.education.scholastic.com/slms/studentaccess>

SAM Server URL information is also available from the district SAM administrator.

Press the Home button to return to the iPad Home Screen. Tap the app to open it and move the program's login screen.

Mobile Device Functionality

Most programs function identically on a workstation or mobile device, with the exception that users tap buttons and links on the user interface, rather than use a mouse or pointer as they do on workstations.

Guided Access

Guided Access is an iOS function that allows users to modify their device settings. Teachers and administrators may use Guided Access to control which iPad functions and buttons are enabled or disabled for student use. This may be useful for teachers with young students who may accidentally tap the iPad Home button during interactions with Screener or Software. For more information on accessing and using Guide Access, see the iPad User Guide available at www.apple.com.
