Eric Nord

Whether you're curious about metal working and want to know more about what metals you can weld and how to weld, or if you are interested in tinkering with metal art, come learn how to wirefeed (SMIG), stick/arc weld (SMAW), and TIG welding. This class is based on the beginner who may or may not have a welder, but would like to know how to get started, what is required, and how to make it work. We will be practicing MIG and ARC welding primarily and the class will include building a metal rose. Mothers Day is coming soon. Give a gift that will last for a lifetime. If interested in metal art and building the rose, you can focus on that, but if more interested in learning how to produce quality welds for future building of trailers, deer stands, or maintenance applications you can work on more practice welds, etc. Contact instructor for more information.
