Instructions for Use of Packets:

1. Get your child's grade-level reading and language packs. There are 3 options for getting the packs so your child can work on them:
 - Option 1: Download & print your child's grade-level reading and language packs.
 - Option 2: Download the packs and have your child read and work them on a device (computer, iPad, etc.) at home.
 - Option 3: Notify your child's teacher if you need to pick-up a paper copy when you pick-up your child's breakfast/lunch.
2. Have your child work the activities that correspond with the calendar above.
3. The days in each pack may not be labeled with the numbers 1-5; however, use the first, second, third, etc. day of each pack in the sequence indicated in the calendar.
4. Check your child's work. There is an answer key at the back of the pack.
5. Help your child understand his/her mistakes and have him/her correct his/her work.
6. The materials and activities are opportunities for you to help continue your child's learning and prevent learning loss during the time away from school. Students will not be required to turn them in. Students will not be graded on this work. The fidelity and consistency with which you and your child work through these activities will determine the effectiveness of them.

Instructions for iReady:

1. Go to the district website (www.sunflower.k12.ms.us)
And click on the student/families tab.
2. Click on the Clever link.
3. Have your child login and begin lessons in iReady math.
4. Your child may also work in iReady reading.

5. If your child has forgotten his/her login information, please contact your child's teacher.

Helpful Links for Practicing Academic Skills and Concepts:

1. <http://www.mdek12.org/LearningAtHome> Here you'll find links to screen free activities, digital lessons, educational games, music and movement, and virtual library resources. After going to the link, click on the grade-level of interest, and you'll find the resources or activities available.
2. http://www.openculture.com/free_k-12_educational_resources Here you'll find 200 free kids educational resources: video lessons, apps, books, websites, youtube channels, test prep, and more, along with teacher and parent resources. After going to the link, find the category of interest and check out the related games, activities, books, videos, etc.
