

Community Outreach Coordinators

The role of the Community Outreach Coordinators has three layers: to welcome new NHS families, reach out to the North Hampton community and organize a community building event for the adults of NHS (parents and staff). Their work begins in the summer with updating the PAL New Family Welcome Packet, gathering a list of new families, pairing them with a buddy family and organizing a social for new NHS parents, to be held before the first PAL meeting. The Coordinators also support PAL's effort to encourage the community to get involved in NHS. This position is new to PAL so it will continue to evolve.
