

The Work-Family Connection

Califon School District

Program Clubs & Activities

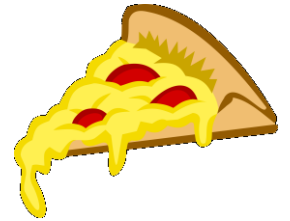

Gardening Club – Students are studying worms and discussing how beneficial they are for gardening! Worms naturally aerate the soil and add lots of nutrients to feed the plants. We also created bags of seeds that we will be planting in a few days before we get ready for spring break. We hope that when we come back from Spring Break everything we have sprouted!

Team Building – Students had so much fun working together in teams building with cups! Here is one of their creations. Very impressive!

Cooking Club – You can imagine the excitement from the students when we made PERSONAL PIZZAS! They couldn't wait for them to finish cooking. They were delicious and made with love!

Sports Club – We've mastered the skill of playing hockey, with a little coaching from the gym teacher and one of our parents. The students have all had so much fun with this, and so have Ms. Mallory and Ms. Dawn!
