

Jan 9-8:55 AM

1 Period
1. Chemistry is the investigation and properties of how something reacts.

- 2.
- blow things up
 - be all around us
 - learn and still have fun

3

- expand your knowledge
- Periodic Table
- all the chemicals and properties that make up chemistry

Lil
Rump ooh

Jan 10-8:19 AM

1) Type of Science that has atoms, elements, and molecules

2) Blow stuff up

- * - Chemistry can make food
- Makes our brain and body work *

3) - Chemistry can save lives
- Chemistry can teach us new things
- Many ways to create things using Chemistry, because matter is Chemistry and matter is everything

Jan 10-8:29 AM

Jan 10-8:51 AM

- ① Physical Science is the history & Study of physical items in the World
- ② teach things that we dont know, the Coolest thing is Expiriments, helps kids Chose Carrers.
- ③ the most important thing is Reserch, helps Students learn, helps Students Get into Collage

Jan 10-9:36 AM

- Who has the best answer in #1? Lexi P. Science is like man-made
- 2.) Some experience you do the properties of science, different elements
 - 3.) Help you learn, different parts of science, do things we can't do

Jan 10-9:45 AM

1. The reactions/behaviors of different substances ★
2. Reactions, explosions, forming of molecules.
3. Applies to everyday life \ shows us how diff metals react \ how the periodic table makes up things.

Jan 10-9:48 AM

- 1.) Studies of reactions $\hat{=}$ measure it
- 2.) learn and share your experiments throughout.
- 3.) - creation of new things in life
- learn elements you never knew.

Jan 10-10:26 AM

- 1) Chemistry is the study of bonds
- 2) The coolest things are labs/experiments
- 3) The most important thing is it helps us live

Jan 10-10:30 AM

Jan 10-10:47 AM

1. The Science of Physical Matter
2. Experiments is the coolest thing, demonstrating, and send rockets to space.
3. Make elements, learn new things, help people with everyday problems.

Jan 10-11:24 AM

1. The study of particles, elements, and reactions on the earth.
2. Provides info about the world and how it works.
3. It creates what makes up the Earth and how to use it.

Jan 10-11:32 AM

① What physical science?

It is about properties of objects and their state of being

②

- experiments
- making a mess
- blowing things up

③

- figuring things out about earth and sun

- find new elements

Jan 10-11:35 AM

Jan 10-1:02 PM

- 1.) The study ^{of} nonliving things
- 2.) Learn about Earth & elements, physical & Chemical Change, and Astronomy
- 3.) Gravity, liquid, Solids, and Experiments
gas?
plasma?

Jan 10-2:46 PM

1. The studies of nature, nonliving things, matter and energy
2. fire + air, make stuff explode, change mass
3. Make stuff, everything, help life

Jan 10-2:51 PM

- 1) The study of science that deals with chemistry mixtures & compounds
- 2) Show chemical and physical reactions. Change one thing to another.
- 3) teach you what things can be converted to how things work

Jan 10-2:56 PM
