Dear Students,

When you get good grades, your parents, relatives, and teachers are proud of you, school is more fun, and most importantly, you feel good about yourself. Whether you are an A student, or a student who only dreams of getting As, this book can help you improve your grades.

Linda O’Brien

Throughout this book you will find quotes from high school juniors John, Maria, Kate, Brad, Greg, Sarah, and Marcus. These students have some great tips and advice for you!

What Kind of Student Are You?

Put check marks in the spaces that best describe you.

1. I complete homework assignments.  
2. I have everything I need with me when I go to class (book, pencils, paper).  
3. I use the time teachers give us in class to start on my homework.  
4. I take good notes.  
5. I ask and answer questions in class.  
6. I know how to memorize information.  
7. After reading an assignment in a textbook, I know what I've read.  
8. I get along well with my teachers.  
9. I am good at taking tests.  
10. I am happy with my grades.

Give yourself 2 points for each Almost Always, 1 point for each Sometimes, and 0 for each Hardly Ever response. **Your Score**

What Your Score Means

**16 - 20 points:** You are a good student. This book will be mostly a review for you. It could, however, help you raise your grades even higher.

**11 - 15 points:** You are a student who could be getting better grades. With this book, you will definitely be able to improve your grades.

**6 - 10 points:** Your grades probably aren't very good. This book can help you change that. It could even change how you feel about school.

**0 - 5 points:** Your grades need serious improvement. Don't give up. This book can help you turn your grades around!

Regardless of your score, this book can help you improve your grades!

Step One
Believe in Yourself

"To succeed, we must first believe that we can." — Michael Korda, Author

In order for you to succeed, you have to believe in yourself and in your abilities. Here's a little story to help illustrate this idea.

Two high school athletes are preparing to compete against each other. They are the same size, and they have about the same athletic abilities. Everyone assumes that it will be an exciting match.

The first athlete runs out. He looks confident, and as he waits, he warms up and stretches. The people nearby hear him say to himself, "I'm ready. I can do this."

The second athlete appears. He slowly shuffles out with his head down, and as he waits, he fidgets with his watch. Those nearby hear him mutter, "I'm gonna get killed."

Two athletes, same size, same abilities... Even before the competition begins, everyone knows who's going to win.

Whether you're an athlete preparing for competition or a student tackling a difficult subject, it's important that you believe in yourself. You need to recognize the talents and abilities you have, and you must believe that you can succeed!

In the grid below, list the courses that you are currently taking. Then in the "Grade" column, write down the highest grade you think you can earn in each course this grading period.

Think of these grades as your goals for this grading period. Believe in yourself, and believe that you can achieve your goals!
Step Two
Be Organized

If you’re organized, you have what you need when you need it.
This section will give you a number of ideas on how to be organized.
Of course, you must determine what’s going to work best for you.

Use a student planner. Take a student planner with you to every class and record each assignment under the date it’s given. Also write down the date each assignment is due. When an assignment is completed, check it off. Use your planner to also keep track of test dates and activities.

“When I look at my student planner at the end of day, it reminds me of which books I need to take home.” Maria

“When using a planner helps me get things done on time so that I’m not turning assignments in late.” John

Break down assignments. Large assignments are much easier to do if you break them down into smaller parts. For example, if you have an English paper that’s due at the end of the week, you could give yourself these four assignments.

Mon. - Do research
Tues. - Do outline
Wed. - Write first draft
Thurs. - Finish paper

After you break a large assignment down, write the smaller assignments in your planner. This will help make sure that you do your big assignments over a period of time, not at the last minute.

Use three-ring notebooks for class notes. Three-ring notebooks work well because handouts can easily be inserted, and if you do miss a class, you can copy someone else’s notes and insert them where they belong. If you purchase a 3-hole punch and keep it in your notebook, you can hole punch your handouts in class and put them in your notebook as soon as you get them.

Use folders for schoolwork. Have a different colored pocket folder for each class. In these folders, keep your current assignments, along with returned assignments and tests. When a folder starts to get full, take the returned papers out and put them in a safe place at home.

In each of your folders, keep a record of your test, quiz, and homework grades for that class. Keeping a record of your grades will eliminate surprises at report card time.

“I write down all of my grades. Then I always know where I stand in all of my classes.” Brad

Have phone numbers for classmates. Make sure that you have a phone number for at least one person in each class. If you’re absent or have a question about an assignment, you’ll then have someone to call.

Keep your locker and backpack neat. Never stick loose or folded papers inside books, your backpack, or your locker. Always put them in the correct folder or notebook. Keeping your locker and backpack neat, clean, and organized makes it much easier to locate materials.

Get organized before you go to bed. Each night, put completed homework in the right folders and get everything organized for the next day. If there’s something you need to remember to do in the morning, leave yourself a note so that you don’t forget it.
Step Three
Manage Your Time Well

With good time management, you have time for the things you need to do, and you still have time for the things you want to do.

Use class time and study halls. Always use the time teachers give you in class to start on homework, ask questions, or get help.

"If I use my study hall and the time teachers give us in class, I don't have nearly as much homework to do at night." Marcus

Create your own study plan. Some students study best at night. Others study better earlier in the day. While it's best to have a regular time to study every day, many students have sports, activities, or other responsibilities they have to work around.

At the end of each school day, look at how much homework you have, consider the time you have available, and develop a study plan.

Eliminate disruptions. Identify anything that could interrupt or ruin your study plan. Then figure out how to eliminate or avoid it.

"I used to get interrupted by phone calls. Now I tell my friends not to call until 9:00 - I just make sure that my homework's done by then." Kate

"I can't start watching TV until I have all of my homework done. If I turn on the TV, my homework probably won't get done." John

Step Four
Be Successful in Class

If you follow the advice in this section, you'll enjoy school more and you'll get better grades.

Be in school every day, on time. When you miss school, you miss class presentations, notes, discussions, assignments, quizzes, and tests. It doesn't matter how good you are about making up your work, you can never make up all of what you miss, even if you're out of school for only one day. To get good grades, you must be in school every day.

Unless you have an extended illness or a serious health problem, you should miss no more than a few days of school a year.

Learn how to adapt to different teachers.

In the classroom, the teachers are in charge and they make the rules. You might have one teacher who counts you tardy if you're not in your seat when the bell rings, and another teacher who considers you on time if you have one foot inside the door. It doesn't matter whether or not you agree with the first teacher's rule; it only matters that you are in your seat when the bell rings.

Part of your education is to learn how to adapt to different sets of rules, personalities, and teaching styles.

"It's really important to know your teachers and to know what they want. Do they give points for participation? Are they strict about rules? Do they grade homework?" Brad

Be prepared for each class. Have everything you need with you when you go to class (books, paper, pencils). Also have all of your homework done. When you've done your homework, you get more out of the class, the material being taught makes more sense, and you can participate in discussions.

Being prepared also means that you come to class well rested and ready to learn.
Sit in the front of the class, if possible. It's easier to pay attention and stay involved when you sit in the front of the class. If you have a problem paying attention, ask if you can sit close to the front.

Be aware of your body language. This counselor's story illustrates the importance of body language.

One day a student named Jason complained to me that his English teacher always picked on him. Jason told me that he never talked out in class, he always did his homework, and that he did everything his teacher asked him to do.

The following week, I went into Jason's English class to talk about scheduling. Jason, who was sitting in the back, never spoke out of turn, never talked to his neighbors, and he did everything he was supposed to do. Nevertheless, as my presentation went on, I became more and more irritated with him. Why? Because of his body language.

Throughout the period, Jason would look at his friends and roll his eyes, or he'd slump his shoulders, let his head drop back, and then he'd sigh. Jason's behavior was clearly saying to me, "This is stupid and boring, and I don't want to do this." I found Jason's behavior distracting and annoying. Of course, I also found out why Jason and his English teacher weren't getting along.

The next day I called Jason into my office and explained to him what I had observed the previous day. Jason was truly surprised that I had even noticed him in the class.

What Jason didn't understand is that when teachers are up in front of a classroom, they see everything. They know who is paying attention, who's taking notes, and who is listening to the class discussion. They also know who is doing homework for another class, writing personal notes, daydreaming, and "napping" (even when students think they have their hands and books set up to hide it).

If you choose to do these things, don't kid yourself into thinking that your teachers don't notice, even if they don't say anything. Teachers notice, and they just assume that you don't care about what's going on in their class. If you want to get good grades, make sure this is the message your body language is giving. Sit up straight, be alert, and look at your teachers when they are talking.

Always do your homework. Don't look at homework as something you should do. Think of homework as something you must do. Since a large portion of your grade is usually based on homework, your grade drops every time you miss an assignment. Complete all of your homework on time and, whenever possible, do extra credit work.

"If you don't do your homework, it kills your grade!" Brad

Be a good group member. Knowing how to work well in a group is a very important skill. Whether you're working on a school project, involved in an extracurricular activity, or working at a job, you need to be able to get along with the other people in the group.

Whenever you're involved in a group project, be sure to do the following:

1. Do your share of the work and do it well.
2. Try to be open to new ideas.
3. Support the other members of the group.

Participate in class. Participating in class makes the class more interesting. It also helps keep your mind focused. Ask and answer questions, and get involved in class discussions. Many teachers give participation points, so participating can also help you get a better grade.

"If I tune out, the class goes on forever. If I participate, the time goes a lot faster." John

Treat others with respect. Treat your teachers and classmates the same way that you want to be treated. Be polite, look at your teachers when they're speaking, and listen when others are talking. Also, be very aware of your tone of voice. The same words, in a different tone of voice, can communicate a very different message.

Remember that teachers are people too. They like having students say hello to them in the halls and they appreciate it when students show an interest in them. If a teacher's been out ill, a simple comment like "I hope you're feeling better" can brighten that teacher's day.

"Teachers want you to talk to them - it lets them know that you're interested and that you care. Teachers are busy though, so if you have a question or problem, see them before or after class." Maria
**Involve your parents.** When your parents ask what you did in school, tell them something about your day. For example, “Well, in English we just started reading this new book about...” Your parents will like the fact that you’re talking to them about what’s going on in school.

A good way to involve your parents is to ask them for help every once in awhile. You could, for example, ask a parent to read over a paper you have written, listen to a speech, or help you study for a test. You’ll get better grades, and your parents will see that you’re really trying to do well in school.

If you ever have a problem with a teacher, class, or another student, let your parents know. They can help you deal with any situation or problem.

**Take responsibility for your grades.** If you get a good grade on an assignment or test, be proud of your accomplishment. If you receive a poor grade, don’t make excuses. Take responsibility for your grade and then figure out how you can get a better grade next time.

Always do your own work. You’ll learn more, and your grades will be something that you can really be proud of.

---

**Step Five**

**Take Good Notes**

Tests usually cover material that has been presented in class. It is, therefore, important to have good notes from which to study.

**Be an active listener.** In order to take good notes, you must pay attention and actively listen to what your teacher is saying.

Kylie is listening to the radio while she’s getting ready for school. The DJ plays several songs, and then he announces that he’s going to play a new song by Kylie’s favorite artist. As soon as she hears this, Kylie sits down next to the radio and listens carefully to the song. She tries to hear every word so that she can understand the meaning of the lyrics.

In this scene, Kylie went from passive listening to active listening. When you’re actively listening in class, you aren’t just hearing the words the teacher is saying, you’re also thinking about and trying to understand the information that’s being presented.

**Take notes to help you pay attention.** You can think much faster than anyone can talk. This is one of the reasons that your mind sometimes wanders when you’re in class. When you take notes, however, your mind has something additional to do, and you don’t have time to think about anything else. Taking notes, therefore, helps you stay focused. Taking notes, of course, also shows your teacher that you are interested in the class and that you’re paying attention.

**Recognize important information.** You can usually tell when a teacher’s saying something that’s important for you to know. Teachers often speak louder or slower, or they repeat information. They also give clues by saying things like “the main point,” “the most important outcome,” or “the biggest reason.” Of course, anything a teacher writes on the board or overhead should be considered very important.

In your notes, underline or put a star beside the most important information. You’ll then know to give it special attention when you’re studying later.

“I highlight anything in my notes that’s really important.” Marcus

---

**Step Four**

**Be Successful in Class**

- Be in school every day, on time.
- Learn how to adapt to different teachers.
- Be prepared for each class.
- Sit in the front of the class, if possible.
- Be aware of your body language.
- Always do your homework.
- Be a good group member.
- Participate in class.
- Treat others with respect.
- Involve your parents.
- Take responsibility for your grades.
Take notes that are easy to read.

- Put the name of the class, the date, and the page number at the top of each page of notes. It will help keep your notes organized.
- Put the subject of your notes at the top of the page.
- Skip lines between topics and only use one side of the paper. Your notes will be neater, and they'll be easier to read. You'll also have space if you want to add something later.
- Use symbols and abbreviations to help you take notes faster. Here are some of the most common abbreviations:
  - = same or equal
  - ≠ not equal
  - > greater than
  - < less than
  - ~ approximately
  - therefore
  - ↑ up or increasing
  - ↓ down or decreasing
  - w with
  - w/o without
  - → resulting in
  - b/c because
  - *= most importantly
  - eg for example
  - esp especially

- Don't worry about grammar or punctuation.
- Leave a wide space or margin on the left side of each page. As you're taking notes, listen for key words. When you hear a key word, write it in the left-hand margin. Key words (topics, people, places, events) help you organize your thoughts, and they make your notes easier to understand.

  Key words can also help you review for a test. Just cover up your notes, look at each key word, and test yourself to see what you can remember about that topic, person, place, or event.

Go over your notes as soon as possible. While the information is still fresh in your mind, take five minutes to go over your notes. Fill in the spaces, rewrite anything that's confusing, and put a question mark by anything you don't understand. Also, make sure that all of your key words are written in the left-hand margins. Of course, as you're going over your notes, you're "fixing" the information in your memory.

If you are really serious about getting the best grade possible in a class, completely redo your notes. Eliminate the unimportant information and rewrite the rest of your notes using your own words.

</table>

Get copies of notes and handouts if you're absent. If you miss a class, it is your responsibility to ask your teacher about assignments, handouts, and tests. It's also your responsibility to make up any work that you've missed. Do not just assume that your teacher will tell you if there's something you need to know or do. Also, get copies of any notes you missed from a classmate and put them in your notebook.

"If I know I'm going to miss school, I try to get work ahead of time. If I'm out sick, I get the work and the notes I missed the next day. I really try not to miss school though - it's such a pain to make things up." Greg

Step Five
Take Good Notes

- Be an active listener.
- Take notes to help you pay attention.
- Recognize important information.
- Take notes that are easy to read.
- Go over your notes as soon as possible.
- Get copies of notes and handouts if you're absent.
Step Six - Know How to Read a Textbook

When you know how to read a textbook, you understand and remember what you read.

Textbook authors have already done a lot of your work for you. They have inserted section headings that tell you what you’re going to be reading about. They’ve put all of the important words in bold or italic print, and they’ve added pictures, charts, graphs, lists of vocabulary words, summaries, and review questions. Textbook authors have provided these “learning tools” in order to make it easier for you to understand and remember the information they’re presenting.

In this section, you will discover how to use these learning tools. You will also learn how to Scan, Read, and Review. Knowing how to scan, read, and review will help you remember what you read.

Scan. Scanning gives you a quick overview of the material you’re going to be reading. To scan, do the following:

- read the title, headings, and everything in bold and italic print
- look at the pictures, graphs, and charts
- read the introduction, summary, and review questions

On the following page you’ll find a music history textbook chapter on The Beatles. If you were to scan this page, you would first read the title and each of the section headings: The Beatles dominate the music industry, The Beatles get their start in Liverpool, The Beatles change their image, The Beatles find success in the U.S., and The Beatles go their separate ways. You would then read everything in bold or italic print, look at the chart, and read the Review Questions.

Scanning provides you with a great deal of information in a short amount of time. (Look at how much you learn about The Beatles just from reading the section headings.)

In addition to providing you with an overview of the material, scanning also provides you with an “information framework.” Having this framework of main ideas makes it much easier to understand and remember the more detailed information.

Read. When your reading has a purpose, you have a reason to stay focused and your comprehension improves.

To give your reading purpose, try turning each section heading into a question. For example, you could turn the heading, The Beatles change their image, into the question, “How did The Beatles change their image?” Keep your question in mind as you read. At the end of the section, see if you can answer it. Questions give you something specific to look for and they help keep your mind from wandering. You are, therefore, able remember more of what you read.

The Beatles find success in the U.S.

In 1964, The Beatles’ music was released in the United States. The sales were tremendous, breaking all previous records. The band came to New York in April, where screaming fans met them at the airport, and 70 million people watched them on the Ed Sullivan Show.

Throughout the 1960’s The Beatles’ popularity grew. Their Sgt. Pepper’s Lonely Hearts Club Band album was released in 1967 to unprecedented critical acclaim. A series of creative, commercially successful albums followed.

The Beatles get their start in Liverpool

In the summer of 1957, John Lennon and Paul McCartney began playing together in Liverpool, England. Later that year, Paul invited guitarist George Harrison to join the group. The band was becoming popular around the area and was booked to play a series of concerts in Hamburg, Germany. The group perfected their musical skills in the Hamburg beerhalls playing standard American rock and roll songs.

The Beatles change their image

On returning from Hamburg, The Beatles were discovered by Brian Epstein. As their manager, Epstein changed the image of the group by exchanging their black leather jackets and tight jeans for collarless suits. He also gave them a new style of haircut. In 1962, Epstein got The Beatles their first recording contract.

Shortly before entering the studio, drummer Ringo Starr was added to the group. The early Beatles recordings were instantly successful, and soon the band was headlining tours.

The Beatles go their separate ways

By the end of 1968 the members of the group had begun to go in different directions. Paul McCartney continued to write “pop” melodies while George Harrison immersed himself in eastern spirituality. John Lennon grew more distant from the band as he grew closer to his wife, Yoko Ono. In April of 1970, McCartney released his first solo album and announced the end of The Beatles.

Throughout the 1970s, The Beatles’ music continued to be popular, and they were constantly hounded to reunite. Lennon’s death in 1980 put an end to any hope of a reunion. The Beatles were inducted into the Rock and Roll Hall of Fame in 1988.
Before you start to read a section, look to see if there are any vocabulary words, names, places, or events in bold or italic print. Then ask yourself, “Why is this word, person, place, or event important?” You should, of course, have an answer to that question when you finish reading the section. For example, after reading the The Beatles change their image section, you should know who Brian Epstein is.

When you have completely finished your reading, you should also be able to answer all of the Review Questions.

**REVIEW.** Okay, you’ve scanned and read the assignment. This is when most students will say, “I’m done,” and close their book. Taking a few extra minutes for review, however, will make a huge difference in what you’re able to remember later. When you review, you lock the information into your brain before it has a chance to evaporate.

To review, go through the same process you did when you scanned the material. This time, as you read the section headings, briefly restate the purpose or point of each section to yourself using your own words. As you look at the vocabulary words and the words in bold and italic print, think about what they mean and why they are important.

If you really want to lock the information into your brain, review everything again a day or two later. When you go to study for the test, you’ll be amazed at how well you already know the material.

It may take a little practice to get the Scan, Read, and Review process down, but you’ll soon realize that this process doesn’t mean more work. It just means better grades.

---

**Step Six**

**Know How to Read a Textbook**

- **SCAN** the assignment to get an overview.
- **READ** with a purpose.
- **REVIEW** to check your understanding.

---

**Step Seven**

**Study Smart**

Students who “study smart” find that they spend less time studying, and yet they get better grades.

**Find a good place to study.** Although it’s usually best to have one place where you study regularly, it doesn’t matter where you study, as long as it has a surface for writing, it’s well lit, quiet, and comfortable. Your study area should also be equipped with paper, pens, pencils, calculator, dictionary, and thesaurus.

Some students need it to be quiet when they study; others like to have music playing in the background. If you like to listen to music while you do your homework, try playing classical music very softly.

“I like to listen to music while I’m doing busywork-type homework, but not when I’m studying.” Maria

“The library is a really good place for me to study. It’s quiet, and I don’t have any of the distractions that I have at home.” Greg

**Get started.** Getting started on your studying is often the hardest part. Don’t put it off until later, don’t make excuses, and don’t wait until you’re “in the mood.” If you have a hard time getting started, begin with something you can finish quickly or a subject you like.

**Know your learning style.** We all learn differently. Some learn best by seeing the material (visual learners), some learn best by hearing the information (auditory learners), and some learn best by doing (kinesthetic learners). Think about how you learn and adjust how you study accordingly.

Visual learners learn best from films, pictures, reading, and demonstrations. If you’re a visual learner, take notes, form images in your mind, use flash cards, and use color in your notes.

Auditory learners learn best from presentations, discussions, films, and music. If you’re an auditory learner, read and review in-
formation out loud, have discussions, make up rhymes to remember things, and explain what you've learned to someone else.

If you're a kinesthetic learner, you learn best when you're doing hands-on activities. Move around while you study, rewrite or type your notes, use objects whenever possible, and act out ideas.

"I must be a visual learner because I have to see what I'm trying to learn." - John

As a general rule, the more senses you involve and the more methods you use to study, the more you'll remember. William Glasser, an expert in the field of education, stated that,

"Students learn 10% of what they read, 20% of what they hear, 30% of what they see, 50% of what they see and hear, 70% of what is discussed with others, 80% of what they experience personally, and 95% of what they teach to someone else."

Organize your study time.

▶ Before you start to study, make a plan. Decide exactly what you want to get done and the order in which you're going to do it.

▶ If you have a lot to do, prioritize your work to make sure that you have enough time for the things that are the most important.

▶ Focus on one thing at a time.

▶ If you have something that seems overwhelming, break it down into smaller parts.

▶ Always allow more time than you think you'll need.

▶ If you have something to memorize, work on that first. Then go over it again at the end of your study session.

▶ Do difficult assignments first, while you're still fresh and alert.

▶ Alternate types of homework (read English, do math, read history).

▶ Know when and how to take breaks. Research has shown that students learn the most during the first and last ten minutes of any study session. After studying for 20-30 minutes, try taking a short break (get a drink, get up and stretch, go for a short walk).

"When I study, I take short breaks between subjects." - Brad

Know how to study for tests.

▶ Know what the test will cover and what kind of test it will be. For essay tests, it's important to understand the big picture and know main points and key facts. For multiple-choice and fill-in-the-blank tests, you need to know more detailed information.

▶ Have all of your reading done ahead of time.

"I try to get all of the reading done a couple of days before the test. Then I just need to skim and review." - Greg

▶ Pay particularly close attention in class the day before a test. This is when teachers will often go over information you need to know.

▶ If your textbook has review questions, know all of the answers. Also, go through your textbook and make sure that you know the meanings of all the words in bold and italic print.

▶ If a teacher gives you a review sheet, study it until you know everything on it. Then use it to come up with questions that might be on the test.

▶ You really know something if you can explain it in your own words. Try teaching material to yourself in front of a mirror.

▶ Review often and review out loud. When you review, you move information from your short-term memory into your long-term memory. Review is the key to learning anything!

▶ Write down any names, dates, formulas, and/or facts you need to remember on index cards. Take these cards with you the day of the test and go over them as often as you can.

Know how to memorize and remember information.

▶ Use flashcards to memorize vocabulary words, facts, and lists.

"If you have a lot to memorize, spread it out over a period of time. Just keep going over and over it." - Brad

▶ Write down what you want to memorize and stare at it. Close your eyes and try to see it in your mind. Say it, and then look at it again. Do this until you know it.
Before you go to sleep, go over any information that you want to remember. Your brain will commit it to memory while you sleep.

Use acronyms to help you memorize. For example, the acronym HOMES can help you remember the Great Lakes (Huron, Ontario, Michigan, Erie, Superior).

Use the first letter of the words you want to remember to make up a silly, ridiculous sentence. For example, to remember the names of the planets for a test, make up a silly sentence like, “My very elegant mother juggled seven ugly neckties.” (Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune). As soon as you get your test, say this sentence to yourself, and at the top of your test, write MVEMJSUN. When you need to write in the names of the planets on the test, you’ll have your memory cue ready.

Look for an easy or logical connection. For example, to remember that Homer wrote the Odyssey, think, “Homer is an odd name.”

Information is easier to remember if it’s grouped or categorized. Use lists and diagrams to group related terms, facts, and ideas.

Use ridiculous, unforgettable images to help trigger your memory. For example, a ridiculous image could help you remember that Hawthorne wrote The Scarlet Letter. Just visualize a large red letter “A” with a big thorn sticking in it saying “Ha!” It can be fun coming up with your own ridiculous images, and they work.

Know how to write a paper. The key to writing a good paper is to spread it out over as much time as possible. Writing a paper should be a process, not a one-time event. When you have a paper to write, go through the following ten steps.

1. Choose a topic that interests you.
2. Gather information. (Librarians can be very helpful with this.)
3. Make an outline.
4. Write a first draft.
5. Read your paper out loud.
6. Think of ways to improve your paper, and then rewrite it.
7. Have someone else read it.
8. Write the final draft.
9. Check for punctuation, spelling, and grammar errors.
10. Make sure that your paper looks neat, and turn it in on time.

When you’re writing a paper, it’s very important to put it away at least once or twice. When you take it out and read it again, you’ll see and hear things that you didn’t notice before.

Be sure to always identify another person’s words or ideas by using quotation marks or footnotes. If you present another person’s words or ideas as your own, it’s the same as cheating. It’s called plagiarism.

Use tricks when making a presentation or speech.

- Use props whenever possible. Props (posters, sports equipment, books) give you something to look at and something to do with your hands. You can also put notes on the back of your props.
- To help add enthusiasm and energy to your voice, pretend that you’re telling your best friend something really important.
- Good speakers make eye contact with the people in their audience. If this is difficult for you to do, look at their foreheads instead.

Study Smart

- Find a good place to study.
- Get started.
- Know your learning style.
- Organize your study time.
- Know how to study for tests.
- Know how to memorize and remember information.
- Use tricks when making a presentation or speech.
- Know how to write a paper.
Step Eight
Be a Good Test Taker

To do well on any test, you must study hard and be prepared. You can further improve your test performance by using these test-taking tips.

Get off to a good start. Have everything you need for the test with you when you go to class (pencil, calculator, etc.). If you have a couple of minutes before the test starts, try to relax.

As soon as you get your test, write anything that you want to remember (facts, dates, equations, formulas) at the top of your test in light pencil. Put your name on the test, and read the directions.

Develop a plan. Before you begin answering questions, quickly look over the entire test and develop a plan. For example, if a one-hour test has 25 multiple-choice questions and 2 essay questions, you could plan to spend 10 minutes on the multiple-choice questions, 20 minutes on each essay question, and 10 minutes checking your answers.

Mark the questions you want to return to. Put a dot or check mark by any answer you’re not sure of. After you have gone through all of the questions, go back to the ones you’ve marked and try them again.

Don’t spend a lot of time on difficult questions, and don’t panic if you don’t know the answers to the first few questions. Sometimes it takes a few minutes for your brain to get in gear.

“If you aren’t sure of an answer, always go with your first instinct.” Greg

Increase your odds on multiple-choice questions.

> Read all of the answer choices. At least a couple of the answers will probably sound like they could be correct. Don’t be tempted to mark the first answer that sounds good.

> “Use the test to help you take the test. Sometimes questions give you information that can help you answer other questions.” John

Look for key words in True/False questions. Statements with all, always, never, every, and none in them are usually false. Statements with usually, often, sometimes, most, and many in them are usually true. Read True/False questions very carefully. One word will often determine whether a statement is True or False.

Know how to approach essay questions.

> Read each question and then start with the easiest one. This will help give you confidence. It will also give you time to think about how to answer the harder questions. Note how many points each essay is worth, and adjust the time you spend on each accordingly.

> Before you do any writing, do some brainstorming. Jot down the key words, ideas, and points that you want to cover in your answer. If you have time, organize your ideas into a simple outline. If not, just number your ideas in the order you want to present them.

> Begin writing. Use clear, concise, complete sentences and write neatly. In your opening paragraph, restate the question and tell the reader what he/she can expect to learn from your essay. In your middle paragraphs, present examples, details, and facts to support the points you’re making. In your final paragraph, restate the most important points, draw conclusions, or write a brief summary. Finally, reread your entire essay and make corrections.

> If you don’t know the answer to an essay question, take a couple of minutes to write down what you do know about the subject. You may hit on something and get partial credit. If you don’t have time to complete an essay, write your teacher a note explaining that you ran out of time. Then briefly list the points you would have covered. Again, you might get partial credit.
**Step Nine**

Reduce Test Anxiety

A little anxiety before a test improves your concentration and alertness. Too much worry, or test anxiety, can lower your test score.

It's possible for students with test anxiety to get themselves so worked up that they can't think clearly. The brain, like a computer, contains a great deal of information. This information is useless, however, if you're not able to "access" it when you need it. Having test anxiety is like not having the password for your computer. The information is there, but you can't get to it.

To reduce test anxiety, study enough to feel confident that you know the material. Then try to replace the worry and negative thinking with thoughts that are positive and relaxing. Some of the following suggestions may help you.

- Start studying early. Cramming only increases test anxiety.
- Mentally practice going through the test. Close your eyes and see yourself walking confidently into the room, answering the questions correctly, and receiving the grade you want. Go through this mental exercise several times before the test.
- The night before a test, review the material, and then get a good night's sleep.
- Walk into the test with your head up and your shoulders back. Tell yourself that you are ready and that you're going to do fine.
- Try these four relaxation techniques:
  1. Take a deep breath. Then slowly release your breath, along with any tension. Do this until you feel your body relax.
  2. Start at the top of your head, flexing, and then relaxing each part of your body.
  3. Close your eyes and visualize warm sunshine washing over you, melting away the tension, and relaxing all of your muscles.
  4. Think of a place where you feel very relaxed and calm. Close your eyes and visualize being in that place.

The more you practice these techniques, the better you'll get. If you continue to have problems with test anxiety, talk to your counselor.
Step Ten - Get Help When You Need It

When you have a problem, do something to resolve it.

Most questions can be answered and most problems resolved, just by talking to the right person (secretary, principal, teacher, counselor). If you need academic help or if you have a class-related problem, talk to your teacher. For most other questions or problems, go to the office or talk to your counselor. If you ever feel threatened or harassed by another student, tell a principal, counselor, or teacher immediately.

All students have problems and concerns they have to deal with. Some students, however, have problems that are so overwhelming that they can't pay attention in class or concentrate on their work. Even though they may put up a good front, these students need to get help.

If you're dealing with any of the following, please talk to a parent, counselor, or adult you trust as soon as possible: alcohol, drugs, pregnancy, abusive relationship, eating disorder, harassment at school, depression, problems at home. Thousands of students are struggling with these same problems. The smart ones get help.

Have you ever seen a grown elephant at a circus or zoo with one foot roped to a stake in the ground? This huge elephant will walk a few feet, but when he feels the tug of the rope around his foot, he'll stop. The elephant could easily break the rope if he wanted to, so why do you suppose he doesn't give the rope a good yank and break it?

Well, when that elephant was a baby, he had just such a rope tied to his foot. Even though he tried and tried, he found that he just wasn't strong enough to break it - so he gave up. Now, as a grown elephant, he continues to believe that he can't break the rope, so he doesn't even bother trying.

Just like this elephant, if you think that you can't succeed, or if you allow past failures to keep you from trying, you'll never get anywhere. Think positively, keep trying, and you will succeed!

Tips For Parents

Your child needs you to be interested and involved in his/her academic progress. Using these tips will help make sure that your child succeeds in school.

Show interest. Attend all open houses and parent conferences. Know when each grading period ends, and make sure that you see all progress reports and report cards as soon as they come out. If you do not see a progress report or report card, call the school and request a copy. Do not just assume that someone will call you if there's a problem.

Recognize extra effort and improvement, and show interest in your child's work. Make it a point to acknowledge each academic success, even if it's only a good grade on a quiz or homework assignment.

Discuss classes and set goals. Sit down with your child at the beginning of each grading period and help him/her set realistic academic goals. Your child will better understand what your expectations are, and having goals will give your child something positive to work towards.

At the beginning of the grading period, Kate and her parents decided that she should be able to earn As in math, English, art, PE, and social studies. Since Kate finds Spanish and science more difficult, they decided that they would be happy with Bs in these two subjects.

You can, of course, offer rewards if goals are met and/or consequences if they're not. Rewards are particularly good when you want to encourage a change in effort, behavior, or attendance. (Eventually, doing well will be its own reward.) Consequences are most effective when they are reasonable and logical. For example, a reasonable and logical consequence for routinely being late to school might be an earlier bedtime. Never take away a positive activity (sports, school plays, music lessons, scouting) as a consequence.

Listen. Talk to your child about what's happening in school and be a good listener.
Be available to help. Be available to help with homework, but don't give more help than is wanted. Your child may not ask again. Keep in mind that it's your child's responsibility to be organized, to get homework done, and to prepare for tests.

Encourage school involvement. Studies show that students who are involved in school-related activities have greater academic success and they enjoy school more. Encourage your child to be involved in one or more school activities.

Monitor activities and jobs. Make sure that your child is not spending too much time online, watching TV, texting, playing computer games, or talking on the phone. If your child has a job, make sure that he/she isn't working too many hours or working too late.

Be aware of what not to do.

- Don't nag about school or grades. Your child will tune you out.
- Don't allow your child to miss school unless he/she is truly ill. You will send a message that school isn't important.
- Don't criticize a teacher in front of your child. Your child will only lose respect for that teacher.
- Don't make your child's failures (or successes) your own. Your child may see getting poor grades as a way to rebel.
- Don't have expectations that are unrealistic. If your child knows that your expectations can't be met, he/she may not even try.

Work with your school. Know that teachers, counselors, and principals are there to help your child get the best education possible. A health problem, death in the family, or divorce can affect your child's attitude and/or performance in school. If such a circumstance should arise, contact the principal or counselor and explain the situation.

If you have a concern that relates to a specific teacher or class, contact the teacher. For other questions and concerns, contact your child's counselor. Be sure to express any concerns that you have in a constructive, respectful manner.

If your child isn't doing well in school, find out why. Most students who don't do well in school feel like failures. They're frustrated, discouraged, and sometimes angry. The "I don't care" attitude they often display is a defense mechanism. It's important for these students to know that their parents haven't given up on them. They also need to know that their parents are interested, supportive, and willing to take the time to help them be more successful in school.

Students who aren't doing well in school usually have problems in one or more of the following areas:

Attendance - It is extremely important for students to be in school every day. Unless a child is truly ill, he/she needs to be in school.

Appropriateness of courses - We can't expect students to get good grades if they are in the wrong classes. If any of your child's courses are too difficult or too easy, call the school counselor.

If you think your child might have greater success in a program with a more "hands-on" approach to learning, ask your child's counselor if your district offers any career-oriented (vocational) programs.

Accountability - It's human nature to be tempted to "slack off" when we're not held accountable. How seriously would most workers take their jobs if they knew their bosses would never know how hard they were working, or find out how many days they missed?

Your child needs to know that you will be monitoring his/her academic progress throughout the year, and that successes will be recognized and poor performances noticed. Your child also needs to know that you will be consistent in your interest.

Alcohol/Drug abuse - Students who abuse alcohol or drugs are often distracted to the point where their school performance is affected. If you know or suspect that your child is drinking or using drugs, talk to him/her about it. If you need information or advice, talk to your doctor or to the school counselor. They can help.

If you believe that there are other reasons for your child not doing well in school, make an appointment to see your child's counselor. Recognizing that there's a problem is the first, and most important, step in finding a solution.
Below are some quotes to get you thinking about what it takes to be successful in life.

- We are what we repeatedly do. Excellence, then, is not an act, but a habit. *Aristotle*

- If we did all the things we are capable of doing, we would literally astonish ourselves. *Thomas Edison*

- The tragedy of life doesn't lie in not reaching your goal. The tragedy lies in having no goal to reach. *Benjamin Mays*

- Successful people have learned to make themselves do the thing that has to be done when it has to be done, whether they like it or not. *Aldous Huxley*

- Failure is the opportunity to begin again more intelligently. *Henry Ford*

- Opportunities are usually disguised as hard work, so most people don't recognize them. *Ann Landers*

- Do what you can, with what you have, where you are. *Theodore Roosevelt*

- Many of life's failures are people who did not realize how close they were to success when they gave up. *Thomas Edison*

- All things are difficult before they are easy. *Thomas Fuller*

- The greatest thing in this world is not so much where we are, but in what direction we are moving. *Oliver Wendell Holmes*

- You are never a loser until you quit trying. *Mike Ditka*

- Life is an echo; what you send out comes back. *Chinese Proverb*
