

November 7, 2017

Parents/Guardians,

Greetings! It is almost time for STEAM (Science, Math, Engineering, Arts, and Mathematics) Night at Hunter Middle School!

STEAM Night is **Monday November 13, 2017 from 5:30-7:30 PM. Please drop in some time during this time frame for a student-led tour of learning.** This night will be **student-led**. In science, math, and related arts classes students will be preparing to present to you a reflection of their learning. You and your student can rotate between their science, math, and related arts classes for a **student-led** tour. During a **student-led** tour, your child will sit down with you and share some of their learning experiences, products, and performances.

We are so excited about the growth we have seen in our students in math, science, and related arts. They have been engaged in a great amount of problem solving, inquiry, production, and performances. Student reflections as well as concrete examples of student work can reveal much more about his or her learning and growth than can be conveyed through grades or comments. We are striving to improve our students' reflective practice on their own work, and our hope is that, in doing so, they can build towards independence as learners.

We would like to include parents as an audience for this reflective work through a student-led tour of their learning. This is a positive opportunity for you to help us give students practice reflecting upon their strengths and challenges as well as their personal goals as learners.

We hope you will be able to attend with your student as they take you on a tour of their learning in science, math, and related arts. Please return the bottom portion of this letter to your child's homeroom teacher by Friday, November 10th.

Sincerely,

Robert Alford
Principal

I will be attending STEAM Night on November 13th with my student. _____

Number attending: _____

We will not be able to attend STEAM Night. _____

Student Name: _____

Parent Signature: _____
