

Lesson 18 Predicting the Weather

Define:

1. Weather
2. Precipitation
3. Air pressure

Anemometer	Wind Vane	Thermometer	Psychrometer	Barometer
This instrument measures:	This instrument measures:	This instrument measures:	This instrument measures:	This instrument measures:

How does a changing air pressure affect the weather?

Warmer air holds _____ water vapor than colder air.

HIGH ATMOSPHERIC PRESSURE RESULTS IN _____ WEATHER.

If the atmospheric pressure is rising there will be _____ weather.

LOW ATMOSPHERIC PRESSURE RESULTS IN _____ WEATHER.

If the atmospheric pressure is dropping there will be _____ weather.
