

## Macon County School Health Services HEAD LICE CHECKLIST

The following checklist has been prepared to assist you. Your child may return to school upon proof of treatment and signed completion of this checklist.

Circle YES or NO for each question below.

- |     |    |  |
|-----|----|--|
| YES | NO | 1. Proof of treatment such as a box top or bottle from special anti-lice shampoo.  |
| YES | NO | 2. Did all household members, including your child have treatment with a special shampoo for killing head lice? (Contact physician Before treating pregnant women, breast-feeding mothers, and children under 1 year of age. |
| YES | NO | 3. Did all household members comb their hair with a fine-tooth comb to remove all lice eggs or nits following the shampoo treatment.   |
| YES | NO | 4. Did all family members put on clean, laundered clothes after treatment?   |
| YES | NO | 5. Were all brushes and combs soaked in HOT water for 10-20 minutes?   |
| YES | NO | 6. Were all clothes which had been worn before shampoo treatment washed?   |
| YES | NO | 7. Was the bedding (including pillows, pillowcases, sheets, blankets, and bedspreads) either washed in hot soapy water and dried in a hot clothes dryer or professionally dry cleaned?                                       |
| YES | NO | 8. Were hats and coats which were worn before and during shampoo treatment washed in hot water with detergent and dried in a hot clothes dryer?  |
| YES | NO | 9. Were bath towels and washcloths which were used before and during the shampoo treatment washed in hot water with detergent and dried in a hot clothes dryer?  |
| YES | NO | 10. Has the whole house and all automobiles being vacuumed for at least 2 days?  |

If you have truthfully answered and circled YES to all previous questions, the chances of your child getting head lice again from within the home are minimized. You also will have done your part to control spread of head lice in your child's school. Thanks for your cooperation.
