December 1, 2014

Dear Woodland Parents,

Woodland School is excited and enthusiastic to announce our first year to participate in the International Hour of Code. The Hour of Code is a global computer coding movement reaching tens of millions of students in 180+ countries! Code.org has developed an elementary school curriculum that allows even the youngest students to explore the limitless world of computer programming. The online courses are self-guided and self-paced tutorials using puzzles and games to teach beginning computer science. This is important as computer science is the foundation to the digital age and STEM careers.

Our plan is to allow every Woodland student to participate in one hour of code during their special area computer lab time the week of December 8. We are inviting computer programmers, parents and friends of Woodland to volunteer to help us with this event. Please email Kim Howard, khoward@ortn.edu or Evan Parker, elparker@ortn.edu if you wish to assist us in this school wide event, our first Hour of Code.

If you would like more details regarding Hour of Code please visit:
