Equitable Access in One Centralized Location

Texas College & Career is a TEA initiative made possible through the 82nd Legislature, General Appropriations Act, Article III, Rider 62, powered by ConnectEDU technologies with assistance from Edvance Research. The Site provides the key components of college and career planning all in one centralized location that's easy to use, available at no-cost to all public secondary students, parents and educators, and includes unique resources designed for students who are more at-risk (such as foster youth and English language learners).

KEY BENEFITS & FEATURES

- Free for all Texas secondary students, parents, and educators
- Accessible online anywhere, anytime
- Intuitive student portfolio, resume & planning tools
- Search & Compare more than 4,500 college profiles
- Research financial aid & scholarships
- Available in English and Spanish

Pilot Experience

In 2010, ConnectEDU developed and managed the state's 'Online College Preparation Assistance Pilot Program', which successfully targeted the increased completion of essential college and career planning tasks throughout the lowest performing high schools. Texas College & Career will expand the reach of these critical exploration, planning, and portfolio development tools by making them available at no-cost to all students and families throughout Texas.

Building Futures Together ...

Whether a student is from an urban, rural, or suburban community trying to navigate the college enrollment process—or their vocational, technical, or agricultural training has prepared them to directly enter the workforce, Texas College & Career makes post-secondary requirements easy to understand for the diverse Texas student populations—particularly first-generation, minority, and low-income students, and students from regions with the lowest college-going rates. The site is fully accessible in English or Spanish.

Available Monthly Training

Free, monthly, online webinar sessions for educators will be offered to maximize their benefit from Texas College & Career. Each session will provide focused discussion on the use of site tools to help in planning for college and beyond. These training webinars will be recorded for convenient access on-demand. A full training calendar is available on the site's "Training & Support Resources" link and on Project Share.
