

The GOLD-BURG HIGH SCHOOL water system PWSID1690014 has violated the monitoring and reporting requirements set by Texas Commission on environmental Quality(TCEQ) in title 30, Texas Administration Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation occurred in the monitoring periods beginning January 1, 2013 through June 30, 2013, we did not complete all monitoring and/or reporting for Disinfectant Residual Monitoring & Reporting, and therefore cannot be sure of the safety of your drinking water during that time.

We are taking the following actions to correct the problem:

The actions will include timely submissions of required reports.

Please share this information with all people who drink this water, especiall those who may not have received this notification directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have any questions regarding this matter, you may contact: Roger Ellis, Superintendent
