Woolfs Intermediate GT

GT Field Trip 2017

The GT students enjoyed a field trip to the San Antonio Museum of Art. They were treated to a guided tour entitled "Parts of Art" and also had plenty of time to explore the museum on their own in small groups. Read what the students had to say about this year's field trip.

I think that seeing American, Latin, German and other cultural works of art helped me understand a little bit more about the aspects of art.

...some art had very deep meanings ...I can't wait to go again.

We were able to learn stuff on our own!

The paintings were smooth and calm to look at.

We saw sculptures, paintings, weapons and sewn things.

It was inspirational. SAMA had a tone of cultural art and items.

SAMA was unbelievable!

I liked the crazy abstract paintings.

SAMA was delightful!

My favorite exhibit was Rome because it was so breathtaking how those sculptures survived so long!

There were delicate sculptures that were centuries old!

I learned more media of art... gourds, minerals, sand and oil on canvas.

My favorite part was the Japanese art because it had a samuri suit and a lot more!

The details wanted to make my mouth drop down all the way to the floor. It was just so realistic!

SAMA was inspiring...the art was telling me to never give up no matter what...

SAMA was breathtaking and inspiring!

My favorite was the Egyptian mummy case because it had a lot of pattern.

My favorite section was the Greek exhibit!

We learned about paintings, sculptures, pottery, jewelry and tapestries. It takes a lot of work to be an artist and I admire that!
