

Mr. Way's Science Newsletter

March 28 - April 1

Hello Fifth Grade Families,

White Light Test is in the books. The test and notebook grades will count on the final grading period. We are now reviewing fourth grade material to prepare for the SOL Test in early May. Half of the Science SOL Test covers fourth grade curriculum. We are beginning with electricity and then magnetism. Students' science notebooks will be collected and graded every other week as we review and prepare for the SOL assessment. I may give a short quiz for a grade during our review. I will communicate this ahead of time in students' assignment agendas.

REMINDERS:

- Homework assignments are communicated via the daily assignment agenda.
