

# Mr. Way's Science Newsletter

**April 11 - 22**

Hello Fifth Grade Families,

We are continuing our review of fourth grade material in preparation for the Science SOL Test in early May. Thus far we have covered electricity, magnetism, and weather. Next week we will cover violent weather and the planets. I am grading work that is going into students' notebooks as well as in-class projects and labs. I do not plan on giving a large unit test any time soon. Homework assignments will be assigned through out the week.

## REMINDERS:

- Homework assignments are communicated via the daily assignment agenda.
- I hope everyone has a wonderful Easter break.
