

Board of Education Negotiations Team Update

February 22, 2018

The Board Negotiations Team met with BTEA on Wednesday, 2/21 with the intention of accepting the Fact Finder's report with one clarification. The Fact Finder combined one of the BTEA and Board's proposals into one document. By doing so, this resulted in a "fact error." If the proposed item is implemented as stated by the Fact Finder, this procedural error would lead to an audit finding for the district, which is against statute and regulation regarding financial practices of the district. The Board will not agree to put language into a contract knowingly engaging in unacceptable accounting practices.

We are seeking guidance from our auditor on this specific matter and look forward to resolving this issue as soon as possible.
