

Kayla Boyd, Junior at Council High School is a semi-finalist for the 2017 Cassini Scientist for a Day Contest (High School Division).

Kayla, along with Madison Presley (Sophomore) and Olivia Presley (Junior) entered the contest by writing an essay, up to 500 words, about an image taken by the Cassini Spacecraft. Kayla chose to write about a picture titled Titan's Lakes. Her essay is attached. The student flyer for the contest and pictures are also attached.

The following is the excerpt from the Cassini Scientist for a Day website.

<https://solarsystem.nasa.gov/educ/scientist-for-a-day>

The Cassini Scientist for a Day contest challenges students to become NASA scientists studying Saturn. Participants examine three possible observations taken by the Cassini spacecraft and are tasked to choose the one they think will yield the best scientific results. This choice must then be supported in essay. The contest meets U.S. National English and Science Education Standards.
