

Hurley Elementary Middle School Students Compete in National Robotics Competition.

HEMS students got the opportunity to participate in the National Wonder League Robotics Competition comprised of over 5,000 teams across 52 countries. The competition was held after school during the Boys and Girls Club. Four teams participated in the competition completing 5 missions. The missions involved thinking skills, creativity, communication, group dynamics, research, and self-directed learning. Wonder League is not only a great afterschool activity but also a great way to help students achieve 21st century skills.

The Wonder League Club is excited and will soon begin math Olympics using Dash and Dot, the Wonder League Robots.

Members of the team competitions and the first robotics team at Hurley Elementary Middle School include Brody Ford, John Ogle, Colin Compton, Charles Blankenship, Audrey Duty, Emma Denver, Jelissa Hurley, Lexie Justus, Matthew Lester, Logan Bailey, Clay Addair, Timothy Potter, Ruthie Blankenship, Lauren Clifton, and Morgan Blankenship.
