

You're **never**
too young

to have **Diabetes...**

CHILDREN OF ANY AGE CAN DEVELOP DIABETES.

Undiagnosed diabetes can lead to a life-threatening medical condition called **diabetic ketoacidosis (DKA)** which may require emergency medical intervention.

KNOW THE WARNING SIGNS OF DIABETES IN CHILDREN!

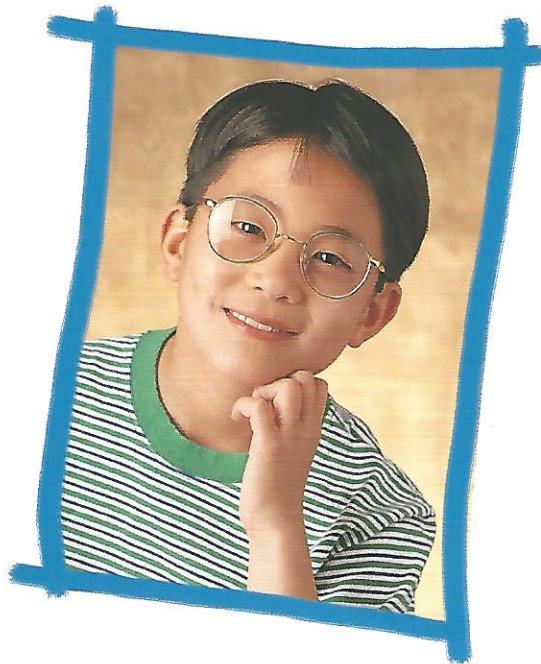

Increased thirst **Frequent urination**

Bedwetting/other accidents in children who are toilet trained

Unusual sleepiness/fatigue **Irritability**

Unexplained weight loss **Nausea and/or vomiting**

Children of any age with symptoms of diabetes should have their blood glucose tested!
