How to Connect your Chromebook to your Home Wi-Fi

Step 1:

In the lower right corner of the screen, you can find the Wi-Fi icon:

Step 2:

Once there, click on the Wi-Fi drop-down to select your home Wi-Fi network from the list. Your Chromebook will automatically look for available networks.

Step 3:

If your home Wi-Fi network has a password, a box will appear prompting you to type it in. Click the **Connect** button once your password has been entered.
