## **Support Services at Christ the King Catholic School**

### **Academic Center for Excellence (ACE)**

Christ the King Catholic School is committed to meeting the needs of all students in the general education program. Teachers licensed in special education meet with the public school, general education teachers, and parents to facilitate and plan to meet the needs of students with learning differences. Accommodations within the classroom and the Ace Room are made to allow students to benefit from the general education curriculum with success. Individual needs are addressed by classroom teachers, Academic Support teachers, and parents. For more information, contact the CKS Academic Support Coordinator, Cheryl Huffine at [chuffine@cks-indy.org](mailto:chuffine@cks-indy.org).

### **School Social Worker**

CKS employs a trained professional social worker one day a week. The school social worker counsels students individually, in small groups, and makes classroom presentations. The school social worker assists teachers with strategies to help students in the classroom, and is a resource for parents as well. The social worker provides crises intervention when needed, along with referral information.

### **School Reading Specialist**

CKS teachers work with our reading specialist to identify students who are somewhat behind in their reading development. Once identified, students work with the reading specialist individually or in small group settings in order to strengthen the reading skills in which they are deficient so that they will be able to read at their appropriate grade level.
