Tongass National Forest 705
Sopris West Six-Minute Solutions

The Tongass National Forest is in southeast Alaska. It is the second largest rainforest (in) the world. Only the Amazon is (bigger). The Amazon is a tropical rainforest. (Tropical) rainforests are found in warm, steamy (climates). The Tongass, however, is a temperate (rainforest). Temperate rainforests are found in cooler (climates).

The Tongass is also the largest (national) forest in the United States. It (is) about the size of New Jersey. (The) Tongass covers 17 million acres of land. (Five) thousand miles of the Tongass are (along) the southeastern Alaskan shoreline. Visitors to (the) Tongass can see ice fields, glaciers, (and) four snowcapped mountain ranges. There are (also) hundreds of islands covered with dense (forests). Hemlock and cedar are the most (common) trees found in the Tongass Islands. (Caves), rivers, and lakes lie within the (Tongass) National Forest. The woods are home (to) many types of wildlife. These include (brown) and black bears, wolves, moose, goats, (and) porcupines. The Tongass has one of (the) world’s largest concentrations of bald eagles.

(The) Tongass serves many functions. It is (a) wilderness preservation and recreation area. There (are) 13 campgrounds and 150 recreational cabins. Nineteen wilderness (areas) and 450 miles of hiking trails attract (many) visitors each year. The Tongass is (also) used for mining and timber harvesting. (The) Tongass provided the timber needed for (both) World War I and World War (II). Only three percent of the Tongass (has) been harvested in the last 94 years. (That) means that the forest consists of 97 (percent) old growth--trees that have been left (undisturbed).
The Tongass National Forest is in southeast Alaska. It is the second largest rainforest (hover, wax, in) the world. Only the Amazon is (umm, bigger, among). The Amazon is a tropical rainforest. (Advertisement, Smash, Tropical) rainforests are found in warm, steamy (climates, comb, listen). The Tongass, however, is a temperate (rainforest, hey, anybody). Temperate rainforests are found in cooler (innocent, gun, climates). The Tongass is also the largest (light, national, underneath) forest in the United States. It (easily, hard, is) about the size of New Jersey. (Owner, The, Annually) Tongass covers 17 million acres of land. (Taken, Five, Sang) thousand miles of the Tongass are (along, say, expand) the southeastern Alaskan shoreline. Visitors to (found, been, the) Tongass can see ice fields, glaciers, (and, jagged, carefully) four snowcapped mountain ranges. There are (also, spoken, room) hundreds of islands covered with dense (big, unusual, forests). Hemlock and cedar are the most (comfort, old, common) trees found in the Tongass Islands. (Taken, Caves, Berry), rivers, and lakes lie within the (warn, Tongass, add) National Forest. The woods are home (arm, borrow, to) many types of wildlife.
