There are three types of bears in North America. They are the polar bear, the brown bear, and the black bear. Canada and Alaska are the only places where all three types of bears live.

Polar bears are marine mammals. They live in very cold climates where there is ice and snow. Polar bears have hair that looks white. They are the largest kind of bear. When they stand on their hind legs, polar bears are between 8 and 10 feet tall. Polar bears can weigh between 600 and 1,400 pounds. They are meat eaters. They have special claws which help them to hold onto the ice and catch seals. The ringed seal is the polar bear's favorite meal!

Brown bears have different colors and names. Some brown bears are dark brown. Other brown bears are blonder. All brown bears have a hump above their shoulders. This hump is made of fat and muscle. Brown bears are 6 to 8 feet tall when standing on their hind legs. They can weigh between 400 and 1,500 pounds. Brown bears eat a lot of different things like bugs, fish, berries, and baby animals. They spend all summer eating to store up fat for a winter nap.

Black bears are the smallest kind of bear. They are only 5 or 6 feet when standing on their hind legs. Some black bears are jet black color. Others are lighter. Most black bears have brown noses and big ears. Black bears weigh between 100 and 400 pounds. They have claws that are sharp and curved. These special claws help them to climb trees.
White, Brown, and Black: The Bear Facts
Sopris West Six Minute Solutions #301

There are three types of bears in North America. They are the polar bear, the (dark, brown, to) bear, and the black bear. Canada (and, only, above) Alaska are the only places where (a, all, cold) three types of bears live.

Polar (snow, bears, between) are marine mammals. They live in (trees, berries, very) cold climates where there is ice (colors, there, and) snow. Polar bears have hair that (weigh, these, looks) white. They are the largest kind (alaska, are, of) bear. When they stand on their (hind, hump, when) legs, polar bears are between 8 and 10 (feet, stand, some) tall.

Polar bears can weigh between 600 (and, ringed, this) 1,400 pounds. They are meat eaters. They (largest, bear's, have) special claws which help them to (winter, hold, muscle) onto the ice and catch seals. (Them, Or, The) ringed seal is the polar bear's (have, favorite, smallest) meal!

Brown bears have different colors (and, canada, lot) names. Some brown bears are dark (brown, very, kind). Other brown bears are blonder. All (brown, the, bears) bears have a hump above their (up, lighter, shoulders). This hump is made of fat (hind, and, big) muscle.

Brown bears are 6 to 8 feet (feet, black, tall) when standing on their hind legs. (The, They, Brown) can weigh between 400 and 1,500 pounds. Brown (bears, for, jet) eat a lot of different things (like, ears, bear) bugs, fish, berries, and baby animals. (There, They, Of) spend all summer eating to store (up, baby, three) fat for a winter nap.

Black (bears, nap, polar) are the smallest kind of bear. (Types, Names, They) are only 5 or 6 feet when standing (meal, polar, on) their hind legs. Some black bears (favorite, different, are) a jet black color. Others are (help, lighter, pounds). Most black bears have brown noses (sharp, and, all) big ears. Black bears weigh between 100 (tall, white, and) 400 pounds. They have claws that are (seals, climb, sharp) and curved. These special claws help (them, places, other) to climb trees.
