

**HONORS CONTRACT
ALABAMA SOUTHERN COMMUNITY COLLEGE
HONORS PROGRAM**

What is an Honors Contract?

Students earn credit in the Honors Program in regularly scheduled courses through satisfactory completion of the terms of an Honors Contract. This contract specifies the difference between the requirements to be met by the Honors Program student and those which apply to regular students in the class. ***These requirements MUST reflect differences based on more than an additional workload.*** They must also show that the additional expectations will provide an experience that is both challenging and enriching. The Contract must be approved by the instructor, the Division Director, and the Honors Program Director.

The Instructor must agree to meet with the student as needed and to file a report on the student's performance at the end of the semester. If either the Instructor or the Honors Program Director considers the student's performance unsatisfactory, honors credit may be denied.

Students must be members of the Honors Program to receive honors credit. No grade below a "B" will be accepted for honors credit. Students may decide not to complete Honors Contracts without penalty in the course, or they may be released from the Honors Contract at the Instructor's discretion if class performance is unsatisfactory. In such cases the student must continue to complete all course requirements and follow ASCC policies pertaining to the course, unless the course has been dropped.
